My GitHub link

zime-a11ly/WEDE5020_UmhlangaBakehouse: Website for umhlanga Bakehouse - WEDE5020 POE

This is where you can find my website link ⬇️

This are my changes I made

Changelog

2026-04-11: Gallery page completed. All images working.

2026-05-13: Fixed based on POE feedback

- Fixed CSS link: Changed from CSS/style.css to css/style.css to match actual folder name (case sensitivity issue) - styles were not loading, now brown theme shows correctly
- Fixed broken link: Deleted Enquiry.html navigation link - file did not exist, caused 404 error. Kept Contact.html only as per site structure (5 pages: Home, About, Products, Gallery, Contact)
- Fixed case sensitivity: Changed products.html (small p) to Products.html (capital P) in index.html View Our Products button - file not found error fixed
- Fixed logo.svg: Corrected SVG code and path to ensure logo displays in header - logo now shows Umhlanga Bakehouse with bread icon
- Tested all pages in Chrome - all navigation working, images cake1.jpg, cake2.jpg, cake3.jpg loading, responsive layout working
